

INTERNATIONAL SOPOT YOUTH CONFERENCE

Entitled: WHERE THE WORLD IS HEADING

The Sopot Science Association (SSA) welcomes contributions to the sixth edition of the International Sopot Youth Conference entitled Where the World is Heading. The conference is the continuation of the Sopot Youth Forum. Since 2008 over 500 scientists from many countries have presented their work during the event.

We invite young scientists or science enthusiasts, university students, Ph.D. students and young doctors to present their work, visions, opinions, and thoughts. The Sopot Youth Conference consists of two thematic blocks: **humanities and social sciences** and the second one **natural and physical sciences**. **Both oral (15 minutes) and poster presentations are welcome.**

This year, we are seeking presentations for special, interdisciplinary sessions dedicated to women and girls in science and the session organized by the GeoPlanet community. More information will be provided in the second circular.

Due to the uncertain COVID-19 situation worldwide, the 2022 edition of the conference is planned to be held in an entirely online mode. Due to the multidisciplinary character of the Sopot Youth Conference abstracts and presentations should be prepared in an intelligible manner. **The Conference language is English. Our Conference Proceedings are registered, and have an ISBN number.**

Just like in previous editions this year the best presentations will be granted FINANCIAL AWARDS.
